SUMMARY

Software developer with 5+ years of experience working on small teams that managed tight timelines while maintaining a delicate balance of efficiency and quality. Enthusiastic about joining a tech team that is dedicated to the craft of continuously learning and applying their skills to build out impressive products.

TECHNICAL SKILLS

Proficient: *HTML5, CSS, React, Javascript*
Knowledgeable: *Node, Git, Express, Tailwind, Prisma, Easy-Peasy*

TECHNICAL PROJECTS

Grace Shopper |Full Stack Developer | December 2022 | github.com/Coffee-Mug-Bandits/graceShopper |
https://heistcoffee8.fly.dev/
E-Commerce website where one can buy products and see order history
- Resolved multiple Tailwind CSS bugs by rigorous researching and implementing fixes
- Individual contribution includes built order history utilizing back end routes and displaying items on the front end
- **Technologies used: Javascript, Node, React, Express, Tailwind, PostgreSQL**

FitnessTracker | Full Stack Developer | November 2022 | github.com/CamdenJenkins/fitnessTrackerBackend |
https://fitnesstracker12.fly.dev/
Social-media site where workout routines are created and posted
- Reviewed and located bugs in the backend, then fixed by changing queries for future use in the front end
- Implemented database in back end that is pulled to the front end and then displayed
- **Technologies used: Javascript, Node, React, Express, PureCSS, PostgreSQL**

StrangersThings | Web Developer | October 2022 | github.com/CamdenJenkins/strangersthings2|
strngrthngs.netlify.app/
Classified advertisement website where one can buy and sell products and send messages
- Collaborated in a virtual workspace with 1 other developer
- Created API routes from an existing database by pulling information and then implementing on to the front end
- **Technologies used: Javascript, Node, React, Express, PureCSS**

Set Painter | **Motion Picture Industry** | Los Angeles, CA | July 2017 - August 2022
- Efficiently and effectively completed intensive labor of painting large constructs, sometimes involving heavy machinery while working on crews of 5-10 and hitting tight timelines
- Carried out project plans for set design for movies and TV shows with upwards of $10 million in total budget and with major companies such as Netflix, Warner Bros, HBO, Paramount and Universal
- Consistently increased productivity with each team addition by providing knowledge of lesser-known techniques and mentoring on best practices for set project planning.
